Media (ceramic & plastic)	Centrifugal Barrels & Discs	

CUSTOM WORK

AGSCO can **custom screen and classify** granular materials to meet your specifications. We can remove the oversize, coarse particles or we can remove the fine particles from a product. We can match a particle size distribution.

AGSCO can **custom blend** granular materials, dry powders, resins & pigments to meet your needs.

AGSCO can **custom coat** various minerals with materials to meet your specifications. These coatings can increase the performance of abrasive grains or fillers in resin systems. The coatings can color a product.

AGSCO can **private label** products for you. We can also package into small containers such as jars or large containers such as bulk bags.
