To Whom It May Concern:

**RoHS Status for Agsco Corporation Products**

This letter addresses the status of our products, under the European Union's Restriction of Certain Hazardous Substances (RoHS)-Directive 2002/95/EC.

The preparation of AGSCO products or formulations does not utilize any of the RoHS regulated hazardous substances.

Since four of the regulated, hazardous materials are inorganic substances, it is possible that trace amounts may be present, because such chemicals may be constituents in the raw materials processed. However, based on our knowledge, our products do not contain hazardous substances restricted under RoHS in amounts greater than or equal to the maximum specified concentration values established by RoHS.

If there is further concern for the presence of the regulated substances then the interested party should undertake their own testing to confirm the safety of the products.

If you have any further questions, please let me know.

Kind regards,

A handwritten signature in black ink that reads "Mike Michaelis".

Michael D. Michaelis  
Vice President & General Manager  
AGSCO Corporation  
Wheeling, IL
